Data Flow Diagram

The Data Flow Diagram (DFD) illustrates how soil and environmental data flows through the **OptiCrop – Smart Agricultural Production Optimization Engine**. It shows the interaction between the user, system processes, machine learning model, and data stores to generate an accurate crop recommendation.

Symbols Used

Symbol	Name	Description
Oval	External Entity	Farmer/User interacting with the OptiCrop system.
Numbered Rectangle	Process	Performs data processing and crop prediction.
Open Rectangle	Data Store	Stores crop dataset, trained model, and crop information.
Arrow	Data Flow	Represents the movement of data between entities, processes, and data stores.

DFD – OptiCrop

(Smart Agricultural Production Optimization Engine)
